Cyber Readiness Institute

The Cyber Readiness Institute's Cyber Leader Certification Program is a personal professional credential that can be achieved after completing the Cyber Readiness Program. This management program will enhance your understanding of creating and sustaining a cyber ready culture in your organization.

It is free and can help business leaders better manage people, process and technology in a small or mid-size organization.

NIST Cyber Security Framework Govern protocol

The National Institute of Standards and Technology (NIST) has updated the widely used Cybersecurity Framework (CSF), its landmark guidance document for reducing cybersecurity risk. The new 2.0 edition is designed for all audiences, industry sectors and organization types, from the smallest schools and nonprofits to the largest agencies and corporations — regardless of their degree of cybersecurity sophistication.

It contains a new section that addresses what senior leadership needs to know about cybersecurity (Govern). The site contains implementation examples, quick start guides and mappings to assist even the smallest businesses in implementing the framework.
